FLOWER SEED NOVELTIES OF MERIT FOR 1941

PETUNIA SUPER FLUFFY RUFFLES—SALMON ROSE

Antirrhinum Nanum Grandiflorum Rust Resistant "Amber and Gold"

Buds first appear as a soft rose pink. As the spikes open they show florets with full golden yellow lips and hoods of golden amber. The throat of each floret is a soft shade of rose-pink. Amber and Gold grows 18 inches tall and produces plants with ten and twelve sturdy base-branching spikes. Clusters of well spaced florets make these stems ideal for cutting.

Trade Pkt.\$0.35; 1/8 oz.....\$1.25; 1/4 oz.....\$2.00

Aster

Wilt Resistant Princess Type

This new type Aster provides a needed, new form for the cut flower grower. The blooms which are similar to the older Aurora type have a full crested center surrounded by several rows of strong guard petals. They are fine keepers and good shippers. Plants in the field are from 18 to 24 inches in height, but of course, when grown under some shade would double their height.

Princess Anne—Peachblossom shade.

Princess Bonnie—Beautiful soft salmon rose.

Princess Marsha—Cinnebar scarlet.

Marigold Mission Giants

Mission Giants are a new and distinct type of Marigold, which our grower has been working on for a number of years. The blooms, which measure from 4 to 5 inches in diameter, are almost a perfect ball. In both size and form, they remind one of the large incurved Chrysanthemums that are seen during the Fall months. Plants grow about 18 inches high and produce from 8 to 12 stems of excellent cutting length. It is very early, coming into bloom fully two weeks ahead of the ordinary African types.

Petunia Super Fluffy Ruffles

Salmon Rose

See Illustration

An outstanding selection taken from Super Fluffy Ruffles mixed, this beautiful Salmon Rose Petunia will find a ready market by the discriminate grower. The blooms average 3 to 4 inches in diameter and are so frilled and ruffled that they are often mistaken for doubles. The color, as the name indicates, is Salmon Rose, leaning toward the deep side with a golden throat.

Petunia

All Double Dwarf Victorious

Blue Brocade

A silver medal winner in the 1941 All-American trials, Blue Brocade is a very dwarf plant with all double, true violet Blue flowers. Especially valuable to the florist trade for pots and bedding, it is an important color addition to the Victorious strain of Petunias.

Petunia Hybrida

Radiance

Winner of a silver medal in the 1941 All-American Selections, Petunia Radiance will be in great demand by the flower loving public. There is more rich brilliance and life in the color of Radiance than in any Petunia, regardless of type. A cerise rose with enough underlying salmon to remove the harshness commonly found in a cerise rose. The throat is golden yellow, which tends to add warmth and life to the general color. Radiance is very floriferous and holds its uniform and neat habit well into late Fall.

Phlox Gigantea

Rosy Morn

(for illustration see page 12)

A bronze medal winner in the 1941 All American Selections, Rosy Morn possesses the large sized blooms and free flowering quality of Phlox Gigantea Art Shades. Somewhat the same color combination as found in Petunia Rosy Morn, this color will be a welcome addition to the already popular gigantea class.

Zinnia

Lilliput—Black Ruby

Winner of a bronze medal in the 1941 All-American trials, Black Ruby is a deep velvety maroon, which is a distinct color for this class of Zinnia.

Howard's Giant Crested Mixed

For illustration see page 15.

This new Zinnia will undoubtedly become an important cut flower for florist use, as it contains almost all known colors and shades to be found in this popular annual. The blossoms average from 4 to 5 inches in diameter, with a full rounded cushiony center surrounded by broad guard petals.

Nanum (Semi-Dwarf) Varieties

We are pleased to offer to the trade the following semi-dwarf varieties of snapdragon. This seed is imported direct from England where it has received great acclaim as the finest variety for bedding purposes. The plants are very free flowering with strong stems which in itself recommends it for cut flower purposes.

Amaryllis**Gold Medal Strain**

Secured from a hybridizer, who has been line breeding for many years, with the objective of increasing the size, form and range of color in the flower of this popular bulbous plant. This strain leaves little to be desired. The blooms run nine to ten inches and over, are flat and spreading with short necks borne on erect stems. The range of colors run from pure white grounds with delicate markings to dazzling Scarlet, Crimson, Rose and Bright Red self colors.

GLADIOLUS

For Greenhouse and Outdoor Planting

The crop this year is of splendid quality, but second size are definitely in short supply. As usual, we have contracted for a good supply of well cured bulbs, up to size and true to name. Prices on all varieties are low enough so there is no gamble for anyone who wants to plant for their own retail sales.

NOVELTIES IN LARGE MUMS AND POMPONS FOR 1941

This list includes the latest introductions of De Petris, and Yoder Bros., all of which have been tested and passed on by experts before being introduced.

Alameda—(DePetris)

Incurved early commercial producing medium sized blooms. Color medium bronze, somewhat darker than Detroit News. Strong stem and good foliage, medium height. Matures Oct. 25th and gives best results from late crown or terminal buds.

Dark Pink Thos. Pockett—(Szybillo Bros.)

Amaranth pink with a silver white reverse. A sport from the variety Thos. W. Pockett and like it in every respect except color.

Indianapolis White—(Yoder Bros.)

This clear white sport from Indianapolis Pink has all the foliage and growth qualities of the parent variety. An excellent habit and form for a white mum. This will undoubtedly be an exceedingly popular variety. A quality mum for November 10 flowering.

Saratoga—(DePetris)

An excellent commercial variety producing almost 100% perfect blooms of large globular form and perfect fullness. Color a dazzling golden yellow with strong upright stem of medium height, and excellent foliage up to the flower. Matures normally November 1st to 5th. Take bud after August 20th. Winner of the C. S. A. Medal for the best commercial seedling at Cleveland in 1940.

Afterglow—(Yoder Bros.)

A small flowered rust bronze single. Flowers are 2-2½ inches in diameter with 6-8 rows of sturdy petals. Attains a medium height from June planting and forms a spray carrying a large head of flowers when last pinch is made about August 5. Matures November 20.

Apricon—(Yoder Bros.)

An intermediate, apricot yellow pompon. Matures November 25 on rigid stems of medium height when planted in late June and pinches about August 10.

Bronze Freida—(Yoder Bros.)

Growth and foliage of this variety are the same as that of Freida. Flower color is a salmon buff with a light yellow overcast and a deep lemon yellow anemone center. Good for both normal flowering and shading purposes.

Dark Pink Freida—(Szybillo Bros.)

The striking color combination of its deep pink rays and the clear yellow anemone center make this an unusually distinctive flower.

Flamingo—(Yoder Bros.)

As the name implies its color really flames. The hue is scarlet red enhanced by a yellow base. Easily grown to a medium height from June planting. An informal single with its five rows of petals twisting attractively, holding their color unusually well. Matures November 20 and later. Can be had for Thanksgiving.

Goldsmith—(Yoder Bros.)

Large golden yellow pompon of decorative Princeton type flower. Produces well formed sprays on strong stems of medium height when last pinch is made about August 1. Matures about November 20.

Mason's Red—(Yoder Bros.)

The color of this sport is a true crimson with the base of the petal shading to an orange yellow. Will be grown as extensively as its parent variety, which it resembles in all respects except color.

Rooted cuttings of any of above

\$2.50 per 10; \$15.00 per 100; \$125.00 per 1000

Rustic—(Yoder Bros.)

A small decorative anemone. Color is a scarlet tint of Brazil Red which does not fade as flowers age. Matures November 25. Well suited to pot culture. When last pinch is made about September 1-5 it will finish into a shapely plant. Stems are rigid enough to remain upright without staking.

Sarong—(Yoder Bros.)

A beautiful single for mid-December to Christmas season. The color is a bright crimson scarlet. This variety is best grown on raised benches; should be planted fairly early and receive a final pinch about August 1.

Starlet—(Yoder Bros.)

A small deep lemon yellow button type pompon. Blooms about November 25 and should easily replace Golden Sceptre as a yellow button pompon for Thanksgiving. Responds to late June planting and a final pinch about August 12.

Vagabond—(Yoder Bros.)

A pleasing apricot buff single. Flowers are about 2-2½ inches in diameter with 4-5 rows of petals possessing fine substance. Blooms November 15. Attains medium height from June 25 planting. Forms best spray from an August 5 pinch.

Vibrant—(Yoder Bros.)

A large decorative pompon. Matures about December 20. Color is a brilliant deep lemon yellow. Flowers attain a diameter of about 2½-3 inches when fully developed. Makes a fine spray from an August 5 pinch.

White Freida—

Clear white ray florets with a lemon yellow anemone center. Good for both normal flowering and for shading purposes.

Winterset—(Yoder Bros.)

An intermediate, lemon yellow pompon which blooms December 25. Attains a diameter of 2 inches and possesses good substance. Of medium height from June planting with an August 5 pinch. Well suited to ground bed. The latest of the yellow pompons.

Yukon—(Yoder Bros.)

A late clear white single. Flowers about 3 inches in diameter with 5-6 rows of petals. Tall grower maturing about December 10. Is well suited to ground bed culture and will produce a good yield of fine sprays from late planting and a final pinch about August 15.

Yellow Arcadia—(DePetris)

Identical to Arcadia in every respect except in color which is a true Pernet yellow. It has proven an excellent variety for shading maintaining its good color without fading. Matures normally Oct. 25.

Rooted cuttings of any of above

\$2.50 per 10; \$15.00 per 100; \$125.00 per 1000

New varieties introduced by Anderson, Neb.

The Pilot

Rich rose pink, strong grower, with well rounded incurved blooms average 6 to 8 inches. Matures early midseason.

Salmon Freida

Beautiful shade of salmon pink, sport of Freida.

Crystal Ball

Pure white disbud pompon, vigorous grower, free branching habit. Matures Nov. 15 to 20.

Heritage

Rich reddish bronze of small size ¾ to 1 inch. Matures Nov. 5 to 10.

Rooted cuttings of any of above 4 varieties.

\$4.00 per 10; \$8.00 per 25; \$25.00 per 100

Hormodin

Hormodin Powder and Hormodin Liquid are root-inducing chemicals which stimulate rapid root growth on cuttings. Many plants formerly impossible to propagate from cuttings may now be rooted with the aid of Hormodin.

Powder—Since different plants require different treatment, Hormodin Powder has been developed in three strengths, paralleling the range of hormones in nature.

No. 1. A general-purpose powder especially good for carnations, roses, poinsettias, chrysanthemums, and similar types.

1¼ oz. tin.....\$0.50 1 lb. tin.....\$3.00

No. 2. Designed for many of the woody and semi-woody types.
1¼ oz. tin.....\$0.75

No. 3. Designed for the more resistant species including many evergreens and dormant leafless cuttings.
1 oz. tin.....\$1.00

"A" Liquid—The liquid form of Hormodin is applied as a dilute, water solution. It offers the possibility of treating cuttings with any desired concentration at a cost of only a fraction of a cent per cutting.

Puttitaape

The permanent glazing for Greenhouses. This tape is a strip of lead metal with permagum mounted on it, and comes all ready for use. The permagum or putty is made from a secret formula and will stay soft for years under all conditions of weather. Easy to apply, just unroll, lay it over glazing bar and smooth out with a putty knife. Put up and sold in 100 foot units, price 3 1/2 cents per foot in lots under 1000 feet, in lots over 1000 feet, 3 cents per foot.

Rozak Sealing Compound

Rozak Sealing Compound is especially adapted for setting or sealing glass and repairing air or water leaks in greenhouses.

It is water-proof and weather-proof and dries to a rubbery firmness that allows for expansion or contraction. Its surface dries in twenty minutes and will not pull away from wood, steel, or glass. Applied with a special sealer gun, it is easily and quickly applied.
